# WHERE WE ARE TODAY

## **WE HAVE HELPED INVESTORS REACHED THEIR FINANCIAL GOALS**

This document is a complete overview of the origin, purpose, journey, and destination of Blaneco. The paper provides information to anyone looking to become a partner or investor with Blaneco such that they understand the values and integrity held by the investment company.

The origin of this company is simply illustrated with the need to solve the problems most investors (and companies) faced at the time of inception. The purpose is thus rooted in the origin, and is explicitly introduced in the company's vision and mission statements found in the document and on the company's website. The journey has been highly productive so far, with happy and satisfied clients. Even when the odds stood against us, our insurance policies ensured that our investors didn't have to suffer unnecessary losses. Our destination is that point where everyone who joins our clientele becomes convinced that we are that friendly, accessible, and result-oriented company that keeps to its word.

This whitepaper is updated as we make significant strides as a company and thus may require you to also speak with our customer care unit, marketers, or any authorized agent, partner, or member of the company. We look forward to having you on board.

## ABOUT US

BLANECO is a Blockchain investment company specializing in delivering the best investing services and trading strategies for online investors. We focus on helping individual and institutional investors to identify investment opportunities, avoid potential risks, increase return on investment (ROI), optimize investment portfolios, and ultimately equip them with strategic insights and operational skills in the online trading markets that include foreign exchange, stocks, bonds, mutual funds, exchange-traded fund (ETF), certificate of deposit (CD), and bonds.

### HOW TO EARN WITH US

The model is simple: using human and mathematical models, we spot trade opportunities on commodities such as gold, diamond, natural gas and so many others, as well as crypto currencies. Then the investments made by clients is distributed by quota into these assets, using artificial intelligence. The profit generated is distributed to investors with a valid investment plan, and according to the investment package enrolled in. Trade calls are backed by other stakes to bet the market flotation in order to avoid loss to the clients as minimum as possible, where these returns are been done 5 times in a week.

### PROFIT GENERATING PRINCIPLES

We use a kind of margin known as PAMM (percent allocation management module) which makes sure these profits are always allocated. If any losses occur, it is managed by the company not its investor (thanks to our internal investment insurance policy).

---

This means the investors always get their allocated profit. This is an apt example of a win-win approach for all clients. Investors are meant to select a package where these generated profits are distributed based on what is invested (higher investment plans attract higher returns on investment), withdrawals are made weekly or monthly, and are paid out in crypto currencies (bitcoin).

# OUR PORTFOLIO OVERVIEW

## PORTFOLIO ASSETS DISTRIBUTION

Identifying meaningful investment opportunities in the financial market is getting more challenging. Most investors go through a series of advice and still miss out on the ideal assets distribution for a profitable portfolio. So, we took the guess work out of the way and put the work on our shoulders.

We designed a portfolio structure that makes the investment both secure and profitable at the same time. We identify and analyze emerging trends in the markets. Then we put together the market dynamics, regulations and strategies that are constantly impacting the markets, in order to obtain optimum output.

Considering all these, we design investment classes to adapt to client's goals at the point of entry. That's why each investor feels like the only one we have. We make it all about the investor.

# INVESTORS BENEFITS

## **BENEFITS OF INVESTING WITH US**

The benefits of trading with BLANECO include: -Complete transparency of all transactions. -Each trader is in control of his trading account. -All transactions on our website are monitored and regulated by law. BLANECO'S leading traders have been involved in its development.

- Customer Support: 24/7

## 10% ROI

### PROFESSIONAL

- Minimum Deposit: \$10,000.00
- Maximum Deposit: Unlimited
- Contract Duration: 30 Days
- Compound Autopilot: Available
  - Safe Lock: Yes
- Instant Withdrawal: Yes
- Customer Support: 24/7

# RISKS MANAGEMENT & FUNDS SECURITY

## **RISK MANAGEMENT AND SECURITY OF FUNDS**

Our first step towards risk management is identification and assessment of the risks involved in our investment strategies, which in this case involves the following: loss of investment capital through mismanagement of funds, losses due to general market downtrend, losses due to cyber-attacks and system failures. Upon successful identification and assessment, we employ the following strategies:

### **Avoidance:**

we avoid mismanagement of funds by employing skilled traders with a minimum of six years' experience in the financial sector or at least three years in the stock exchange market.

### **Reduction:**

We reduce losses due to general market downtrend by investing in commodities like Gold to ensure consistent profit generation.

### **Sharing:**

Sharing losses between regular investors and stakeholders minimizes the total percentage loss per investor, this ensures that we maintain the minimum achievable profit for every investment plan.

## **Retention:**

We also budget for cases of cyber-attacks by mapping a significant percentage of the company's profit monthly for system maintenance and general security upgrade.

## **CONCLUSION**

In conclusion, we intend to get to the top of the crypto investment market and maintain our position against all odds for as long as it's humanly possible. Our team of experts are constantly working towards the development of new and advanced trading strategy for consistent guaranteed profits.

### CRYPTO CURRENCY

With crypto currency being young, and the market being historically volatile, there is no yes or no answer about the wisdom of investing in crypto currency. It is with this in mind that we cover some pros and cons and friendly (but not professional) advice.

### STOCKS

Invest in commodity-related stocks. Buying stocks related to certain commodities is a way to bet on the value of a commodity without incurring all of the risk of futures trading. Commodity investments tend to attract more investor attention when inflation fears start to mount.
